ABOUT ME

An aspiring software developer with a passion for coding and problem-solving, possessing a strong foundation in programming languages such as Java, PHP, Kotlin, C# and C, as well as web development technologies such as HTML, CSS, and JavaScript. Attention to detail is a strength, with the ability to identify bugs and inconsistencies in code. Effective communication skills have been demonstrated through team-based projects and presentations, allowing for collaboration with fellow developers and stakeholders to achieve project goals.

WORK EXPERIENCE

System Support Engineer
Cardzone SDN BHD   **2024 FEB - 2024 AUG**

- Utilize technical skills in Java, JavaScript, and database management across platforms like Oracle, MariaDB, and DB2 ensuring robust web application performance.
- Lead and collaborate with a dynamic team to deliver tailored CMS solutions, ensuring alignment with project objectives and client requirements.
- Help debug and check log files to identify and resolve system errors.

Full-Stack Developer
goSMAC SDN BHD   **2021 OCT - 2022 JAN**

- Responsible for developing and maintaining web applications with a focus on both front-end and back-end development.
- Utilized a variety of programming languages and frameworks such as JavaScript, HTML, CSS, PHP, and CodeIgniter to build and improve the chatbot portal.
- Demonstrated strong attention to detail and effective communication skills while working remotely with colleagues and supervisors.
