TECHNICAL SKILLS

Languages: Java, JavaScript, PHP, C#, C, Kotlin

Web & Mobile: HTML, CSS, CodeIgniter, WordPress, Android

Cloud & AI: AWS, Azure, AI / GenAI solutions

Databases: MySQL, Oracle, MariaDB, DB2

Tools & Concepts: Git, REST APIs, OOP, Agile, Workflow Automation

WORK EXPERIENCE

Consultant

Aug 2024 - Present

ISATEC Innovation Sdn Bhd

- Build new applications, APIs, and AI/GenAI solutions, and develop web and mobile systems for enterprise clients.
- Integrate cloud services across AWS and Azure and automate business workflows.
- Contribute to enterprise digital-transformation projects from design through delivery.

System Support Engineer

Feb 2024 - Aug 2024

Cardzone Sdn Bhd

- Built and maintained web applications in Java and JavaScript across Oracle, MariaDB, and DB2 databases for POS, ATM, and financial-switching systems.
- Delivered tailored CMS solutions with the team, aligning features to client requirements and project objectives.
- Debugged production issues by analyzing log files to quickly identify and resolve system errors.

Full-Stack Developer

Oct 2021 - Jan 2022

goSMAC Sdn Bhd

- Developed front-end and back-end features for a chatbot portal using JavaScript, HTML, CSS, PHP, and CodeIgniter.
- Improved usability and fixed defects while collaborating remotely with colleagues and supervisors.

PROJECTS

DeLens - AI Trading Companion | [React](#) / [AI Chatbot](#) / [AI-Powered Chrome Extension](#)

■ Champion - Deriv AI Hackathon 2026

Trading platform that analyzes candlestick charts, gives personalized profit/loss and 'take a break' alerts, predicts likely moves, and profiles each trader with a behavior-based radar map - plus a Chrome extension to analyze highlighted text in-app.

AI Financial-Inclusion App | [AWS](#) / [Alibaba Cloud](#) / [Bedrock](#)

■ Top 10 - Touch 'n Go Hackathon 2026

Super-app for underserved users: AI-powered KYC (ID OCR + face match), voice onboarding, family transaction approvals, scan-and-pay bills, AI spending insights, trust-score microloans, and a government spending-heatmap dashboard.

AR 3D Fashion Store + AI Chatbot | [Final Year Project](#)

Online fashion store with augmented-reality 3D garment previews and an AI chatbot styling assistant.

Durian Track & Trace | [Blockchain](#)

Blockchain app recording each durian's farm-to-buyer journey on an immutable ledger for verifiable provenance.
